Kelba KCS-300 ***Chair Scale***

Kelba's **Model KCS-300** is a stable, well constructed Chair Scale which provides the operator ease of use. The **KCS-300** arm rests can be raised on either side of the chair for easy person transfer to and from the chair scale, and firmly fold down when the person is seated, helping to reduce lifting strain on both the person being weighed and anyone assisting. The additional hinged footrest can be folded up or down providing additional comfort during the weighing process.

The four large castor wheels of the **KCS-300**, each feature individual wheel brake capabilities, and the wide push handle bar arrangement make it easy to move the scale from one location to other.

These features coupled with the large 300kg capacity and extra wide 530mm seat make the **KELBA KCS-300** Chair Scale the obvious choice for all your people weighing needs.

This scale is not ARTG Listed / TGA Registered.
